DETAILED ACTION

Continued Prosecution Application

1. The request filed on April 29, 2002 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/546,502 is acceptable and a CPA has been established. An action on the CPA follows.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drosdak '652 in view of McMahon.

The patents to Drosdak and McMahon show fishing line and lure connectors. Drosdak shows a line connector having a body 7 having a receptacle or socket 9 having inwardly directed extensions 10. Drosdak shows the body is capable of receiving the end segment of fishing line 6. Drosdak shows a coupler 8. The patent to McMahon shows a connector having a body a and a coupler b attached to the body that is capable of engaging and supporting a fishing lure B, C. The

Art Unit: 3643

coupler is comprised of a pair of resilient hooks disposed in an overlapping state forming a continuous loop in which the lure part is engagable to the coupler by forcing the hooks apart. In reference to claims 1-3, 37, it would have been obvious to provide Drosdak with a coupler as shown by McMahon since merely one equivalent mechanical coupler is being substituted for another. Drosdak shows the extensions positioned at spaced intervals along substantially the entire length of the receptacle and also shows the extensions being directed away from an open end of the body.

4. Claims 38-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drosdak '642 in view of Drosdak '767.

The patents to Drosdak show fishing line and lure couplers. Drosdak '642 has been discussed above. Drosdak '767 shows a coupler attached to a body 10-12, the coupler comprises a pair of opposing plates 14, 14' which are biased together and prongs 18, 20 carried by and between the plates capable of securing a hook eye of a lure. In reference to claims 38, it would have been obvious to provide Drosdak '642 with a coupler as shown by Drosdak '767 since merely one mechanically equivalent coupler is being substituted for another and the function is the same. In reference to claims 39-40, see the rejection of claims 2-3, above. In reference to claim 41, Drosdak '642 as modified by Drosdak '76 7 shows the pair of plates extending away from an open end of the body.
